WHAT IS THIS PRODUCT?

Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (SICAV).

Term

This product has no maturity date. However, the manufacturer may decide to close the product under certain circumstances.

Objectives

The Fund seeks to achieve capital appreciation by investing mainly in inflation-linked bonds, in order to hedge the inflation risk.

To achieve its objective, not less than 75% of the Fund's net assets may be invested in bonds rated equal or higher than Standard and Poor's and Fitch's A or Moody's A2. In case of different rating level from different agencies the lowest is to be considered. The Fund may invest in money market instruments and hold, on ancillary basis, cash. The Fund will have a maximum allowed uncovered exposure in currencies other than the denomination one of 50% of its net assets. The Fund is authorized to use financial techniques and instruments for hedging and speculative purposes. Most of the time, the Investment Manager intends to use futures, options, forward exchange contracts. The use of total return swaps and CDS is on opportunistic basis. The Fund may also invest in structured products, such as but not limited to notes, certificates or any other transferable securities whose returns are correlated with changes in inflation indexes selected, currencies, exchange rates, transferable securities or a basket of transferable securities or an undertaking for collective investment.

The Investment Manager intends to use futures, options, forward exchange contracts. When using total return swaps and CDS, this is only on an opportunistic, ancillary basis and not as part of the core strategy.

The Fund is actively managed and it has no reference benchmark.

The Sub-Fund has been categorized as a financial product falling under the scope of article 8 of the SFDR.

For this share class, the manager applies a portfolio hedge that is intended to minimize the currency risk between the currency of the share class (which is in a non-base currency) and the base currency of the Fund.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class does not pay dividends. Earned income is retained in the NAV.
