RISK AND REWARD PROFILE

Risk Disclaimer

The risk and reward indicator illustrates where the Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the Fund's position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using historical data, which cannot be used as a prediction for the future. Therefore the risk classification may change over time. Even if the Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

Why is this Sub-Fund in this category ?

The Fund is rated in risk category 2 due to the nature of its investments into debt securities. Other risk factors not adequately captured by the synthetic risk indicator are described below.

All these factors may impact the value of the Fund's investments or expose the Fund to losses.

Not all risks affecting the Sub-Fund are adequately captured by the synthetic risk indicator. The following risks may affect the Sub-Fund:

Counterparty risk: which may occur due to the exposure the Fund might have through contracts with third parties.

Credit risk: which are linked to the debt securities the Fund may invest in.

Currency risk: when the Fund invests in assets denominated in a different currency. A devaluation of the asset's currency relative to the currency of the Fund will lead to a reduction in the value of the Fund.

Derivative risk: The use of derivatives results in higher chances of loss due to the use of leverage or borrowing. Derivatives allow investors to earn large returns from small movements in the underlying asset's price. However, investors could lose large amounts if the price of the underlying asset moves against them significantly.

Liquidity risk: which may occur when investments are made in financial instruments that could have a lower level of liquidity in some circumstances for example in the case of a market crash or default of issuers; due to significant redemptions by shareholders resulting in a potential decrease of the value of certain of the Fund's investments.

Operational risk: which may occur due to technical issues for example natural disasters, misunderstandings and fraud.

Full details of all risks the Sub-Fund is exposed to are provided in the prospectus.
